Tarsiner Space Technologies

The downloads for this are about 9 kb, I'm sorry since I live the warez, I recommend other mods.

> **K-15 Kestrelsta Rocket Motor - TR-Mark.Kel.**
> Tarsier Space Technologies
>
> This rocket motor for Kestrelsta has large, pop-up nozzle that Kerbal Construction Kit can't handle. Thus it is made as a separate part. Use it with care and don't forget to add some extra or decorative nozzles to your rocket. Use your own engineering! Download: Cdkan...

I would like to see more x-planes, if only KSL like x-planes. Please PLEASE make this happen!

I would also like to see some large bonuses I'm too lazy to make wings, but if you say I'm a genius I could make 🙂

Oh, you made K-15 and Kestrel? I thought the K-1 stockalike part of Tarsiers (10 cost, 0.625 diameter one) of your models is still my collection of those models.

Boris, you've outdone yourself this time. Bravo!

Great guest...

Now make a set of 1.25 parts to go along with it!

Awesome stockalike 🙂 I'm sorry that I'm a warez fan but the parts in Tarsier Space Tech are not quite 1:1 with the parts in the stock game. Thanks for the mod 🙂

About me: Salty

I think your odds are low first because of a simple question "would it fit in the mods scope?" I mean yes its pre-sputnik but its jet powered and contributed nothing to science unlike the V2 and X1 so it doesn't fit with anything beale said or even implied.

second because you can make it with the new tiny jet stock parts that are coming so why would beale need too?

EDIT:

> **Sampa said:**
>
> Heh, that thing looks like a,more elegant Me-163 Komet!

Yay! its so close already that he doesn't need to make custom "N4Z1" parts!

I'd love to see B-29 parts to go with this!

why? You can't control two planes at once in ksp beale said this mod would expand to pre-sputnik rocketry at best. The b29 is a prop plane.

Available Here

Initial release, including previously shown X-1 parts.

Feedback greatly appreciated.

Enjoy!

Other development:

V-2 will not be moved to this pack (But, will still be removed from Tantares).

Instead will be making Bumper and R2 (Or rather, common parts to create both).

> **Svm420 said:**

> If you decide to make an rpm functional IVA would you consider using ASET avionics? They make a great airplane experience. Awesome looking parts as usual 8)

Many thanks!

I'd consider it sure!

Unfortunately that's an entire other beast, not sure I could do it justice.
